

Joining Decorative Braid Cord

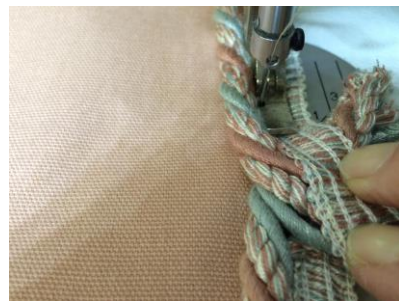

In four quick steps

Begin by stitching the braid cord to the project front leaving a tail of about 3" at the starting point. Stop stitching the braid cord about 2" to 3" from where you started. Leave the needle down as you begin step 1.

Step 1. Starting with the tail, separate the braid cord strands with your fingers.

Step 2. Carefully lay the other end of the braid cord over the separated strands.

Step 3. Stitch the top braid strand over the separated cords and complete the stitching of the cord to the project front.

Step 4. Clip the braid cord strands before completing your project.

The completed join.
